Patriots _____ - Giants _____

Winner: _____

Payout: 20% of total

FINAL SCORE:

Patriots _____ - Giants _____

Winner: _____

Payout: 40% of total

ny NEW YORK GIANTS

How it works: Players buy squares for an assigned value and fill their names into one of the white boxes above. Once all the squares have been selected, pick the numbers 0-9 from a hat and list them in that random order in the Patriots' gray boxes at the top of each column. Do it again to fill in the Giants' gray boxes at the beginning of each row. These numbers represent the last number in the score of each team. In other words, if the score is Patriots 14 - Giants 10 at the end of the first quarter, then the winning square is the one under the "4" column and in the "0" row. Since no one knows what numbers each square will represent, the odds are the same for everyone. Good luck and enjoy!
